PERSONAL RATES OF RETURN (CAD)

CAPITAL DIRECT I INCOME TRUST

Total Rates of Return				Annualized Rates of Return			
This Period	Year-To-Date	12-Months	Inception to Date	3-Year	5-Year	10-Year	Inception to Date
1.79%	7.26%	7.26%	172.35%	7.40%	7.63%	7.90%	8.51%

The table above shows your **personal rates of return***, net of all fees and expenses over different time periods.
Inception date for this account is **September 28, 2007**.

Personal Rates of Return are based on a consistent industry-wide calculation known as the "money-weighted" method after any voluntary reduction in Management fees or Income Participation. This method takes into consideration the timing of your personal deposits and withdrawals. Returns for periods greater than one year represent annualized rates of return. For example, an annual total percentage return of 5% for the 3-Year period means that the investment effectively returned 5% a year in each of the past three years. | Average Cost shown in this statement may not be suitable for income tax purposes, as it may not reflect all required adjustments. It is important for you to keep records of all your investment transactions and consult your income tax advisor to properly determine your gains and losses for income tax purposes. | **Market Value** is the price at which an investment can be sold at a specific point in time. | **Book Cost** means the total amount paid to purchase an investment, including any transaction charges by Capital Direct related to the purchase, adjusted for reinvested distributions, return of capital and corporate reorganizations. | Book Cost shown in this statement may not be suitable for income tax purposes, as it may not reflect all required adjustments. | There is no cash balance held in the account.

*The sale of Class A units may be subject to a deferred sales charge (DSC).
